# INTRODUCTION

## Hints to the use of this newsletter

In order to offer to our customers correct data in this catalogue, all of the references have been assembled and controlled with much care. However, we cannot be held responsible for the consequences of possible errors or omissions. Furthermore we reserve the right to make necessary or technically reasonable changes in the specification of the bearings. NPR of Europe GmbH is OE-supplier to many well-known engine manufacturers. This successful relationship started in 1998 with us being supplier for the bearings of the ACTROS series 500.

The bearings may be fitted without altering the housings or shafts. The design of material and dimensions is based on the original equipment of the engine manufacturers. supply until our stocks last, on the other hand newly added bearings may be available from stock. Please ask our sales staff if you are looking for bearings you may not find in this catalogue or for racing, compressors or any other special applications. Serial numbers and trademarks as well as model and producer's names are only used for reference and transparency.

All orders are accepted and executed according to our General Terms and Conditions, exceptions need our written confirmation. Reprints of and alterations to this catalogue need our written acceptance.

## Certification

As we feel sure that our products as well as our service will withstand every exam, we gladly have our quality confirmed by external auditors. For this reason we are certified according to ISO/TS 16949:2016 and ISO 9001:2015. So you may always rely on our service and the quality of our products.

## Engine structure diagram

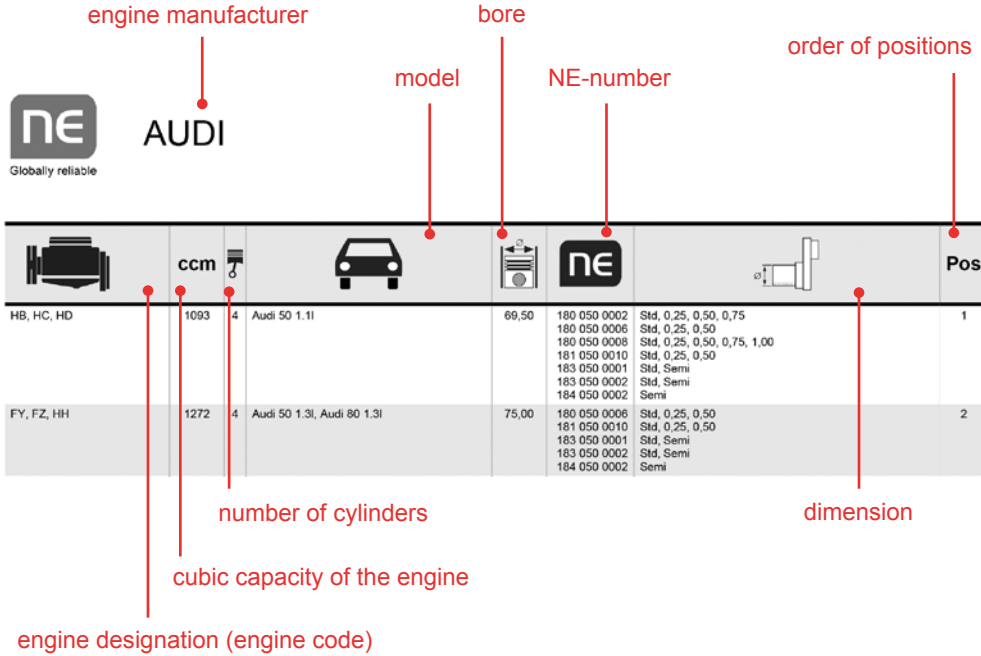

## How to use this newsletter correctly

### Catalogue part

At the beginning of the relevant engine manufacturer, you may find the engine bearing article number(s) matching to your engine code and vehicle model.

The position number is assorted in an alphanumeric ascending order according to the bore diameter of the engine and leads you to the correct product data on the next chapter.

The diagram illustrates the structure of an engine bearing article number. It shows a table with columns for engine manufacturer, model, bore, NE-number, and order of positions. Red lines point from labels to specific parts of the table.
